

Case Study – Eurotray® Roll Seam House #1 Christchurch

Situated on a compact site near Hagley Park this house has been positioned to maximize both the available sun and the section size.

The roof has been clad with pre-painted Calder Stewart Eurotray® Roll Seam and flows into Calder Stewart Quad spouting manufactured from VM Quartz Zinc. Attention to detail has been shown by the alignment of external, Stainless Steel, spouting brackets with the ribs of the Eurotray®.

All roofing and rainwater products are installed by Calder Stewart Roofing tradesman, including the custom Rainwater Heads as shown above.

The clients careful selection of colour and materials has resulted in a highly attractive finish coupled with the additional longevity and low maintenance that VM Quartz Zinc offers

For more information on VM Zinc go to www.vmzinc.com
