

STINGRAY – ½ Round Cast Brackets

Calder Stewart Roofing continues to lead the market with innovative new roofing, wall cladding and rainwater goods. New to the Calder Stewart Half Round Product range is the cast “Stingray” bracket.

This new bracket is available to fit both the 125mm and 150mm Copper, Prepainted, Unpainted, VM Zinc or Stainless Steel spouting.

The Stingray bracket is manufactured from Bronze for use with copper, or Aluminium, either plain or powdercoated, for the other materials.

Designed by well known architectural hardware designer Matthew von Sturmer, this latest bracket reflects both contemporary design and a return to the use of traditional materials.

Stingray brackets are fitted at the same spacings as other brackets in the Calder Stewart range, as the measurement is determined not by the strength of the bracket but by the ability of the spouting to span the distance.
